NOTHING'S MORE REFRESHING THAN RANE®.

TECHNICAL SPECIFICATIONS

Description: Model RM3 is a free standing, 50", side access bathing tub.

Construction: The tub shell consists of 3/16" thick fiberglass-reinforced polyester laminate panels. Critical areas are reinforced with a 1/4" thick core of end-grain balsa and additional layers of fortifying laminate. The sanitary gelcoat is an ISO/NPG type-finish. Tub Frame is welded aircraft grade aluminum box tube.

Side Entry Door: The locking door is right or left hinged, and has a compression-type seal that is Teflon impregnated.

Access Openings: The front opening allows access to drain, legs and air blower. Side opening allows access to tub body.

Drain and Overflow Assembly: An ample 1.5" drain is installed with an overflow.

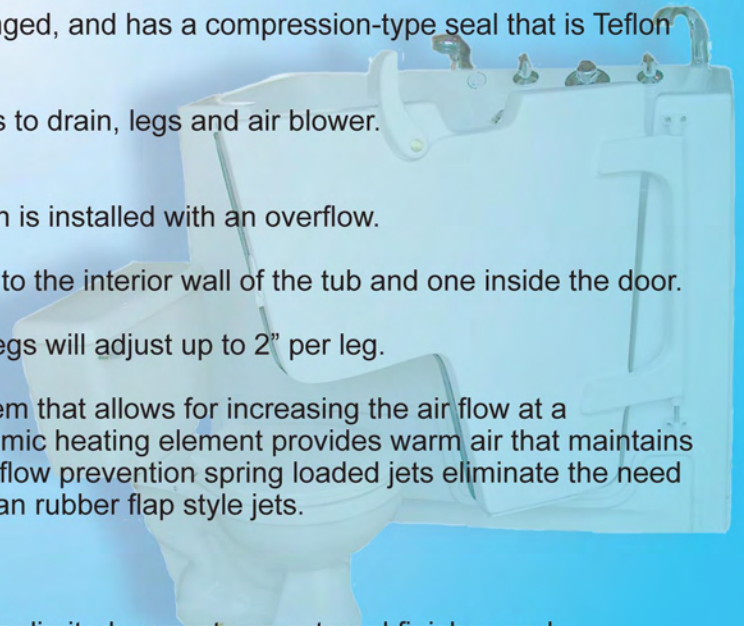

Grab Bars: Two 7.5" grab bars, one firmly mounted to the interior wall of the tub and one inside the door.

Leveling Legs: The sturdy stainless steel leveling legs will adjust up to 2" per leg.

Air Spa Option: The air spa features a control system that allows for increasing the air flow at a gradual rate of speed at the push of a button. A ceramic heating element provides warm air that maintains the water temperature and warms the surface. Backflow prevention spring loaded jets eliminate the need for back flushing air lines, providing for longer life than rubber flap style jets.

Whirlpool Option: Two jet, 3/4" horsepower pump.

Warranty: All Rane tubs come with a standard 5-year limited warranty on external finishes and fiberglass shell, a 3-year warranty on specified parts, and a lifetime warranty on the door seal.
