

# ACCESS WALK-IN-BATHS LTD.

Europes largest manufacturer  
of Walk-in-Baths

Relax with peace of mind....

# Walk-in-Bathtubs

## Lifetime Door Seal Guarantee

The inward opening door seal is guaranteed for life against leaking. A lot of Walk-in-Bathtubs on the market can leak through the door seal. This normally happens when the bathtub is out of guarantee and the supplier tells you there is nothing they can do. This cannot happen with our bathtub.

## Secure, Non Rusting Door Hinge

We use a stainless steel hinge on our inward opening door. There is no possibility of it rusting or discolouring. The door is easily lifted off for cleaning.

# ACCESS

## Features of our Walk-in-Bathtub range

- Contoured inward opening door
- Anti slip floor and seat
- Manufactured in glass fibre
- Optional extension box
- One inch adjustable steel frame

## One Inch Steel Supporting Frame

The only Walk-in-Bathtubs manufactured around a 1-inch square steel box section frame which is fully adjustable to ensure perfect door fitting and alignment. It prevents any twisting and side movement of the door and bathtub. Without this adjustment the slightest structural movement in the bathtub, when it is being used and is full of water, can have a devastating result with water pouring out of the door.

Please, do not buy a bathtub that has not got our adjustable frame.

## Easy To Use Door Locking System

The Door locking system is a circular lever, closing against two elongated cams. Ideal for clients with restricted hand movements.

## Pre-Set Water Temperature

Thermostatically controlled faucets to prevent scalding and a sophisticated mixing valve ensures you enjoy your bath at just the right temperature. Option via your installer

## Pain Relieving Hydra-Spa

The Hydra-Spa is another benefit of our Walk-in-Bathtub helping you to regain your

bathing independence and increase your quality of life. A Hydra-spa operates with only air which is very safe, comfortable, relaxing and pain relieving.

## Plenty Of Room For A Shower

You can also take a shower in your new bathtub. There is plenty of room to stand up and move around. You can have a faucet fitted to your bath and have a mixer valve with a shower attachment.

**Extension Box**  
(Optional)

**Guaranteed Door Seal**

**Locking System**

**Supporting Frame**

# Walk-in-Bathtubs

## The Hawaiian

The smallest of our bathtub range is designed to fit in the smallest of spaces. It has an end opening door that can be hinged on the left hand side or right hand side. The Hawaiian provides that extra bathing facility, either in a small room, a bedroom or in an en-suite.

**Length: 37 ½" (952mm)**

**Width: 26" (660mm)**

**Height: 37 ½" (952mm)**

## The Valmi

The Valmi bathtub with a length of only 42", will fit into the smallest of bathrooms and enable you to enjoy bathing again.

**Valmi Length: 42" (1067mm)**

**Width: 26" (660mm)**

**Height: 36" (914mm)**

## The Royal

Our mid-range bathtub, standing at 36" high, 26" wide & 51 ½" long, the Royal will easily fit in the place of your existing regular sized bath space.

**Length: 51 ½" (1308mm)**

**Width: 26" (660mm)**

**Height: 36" (914mm)**

The easy access door opens inwards to provide maximum space in the bathtub, whilst giving a large entry opening. The door has been designed with an easy, low entry and exit point, whilst the sides of the bathtub provide an excellent hand-hold for added security. The single lever, double cam door lock ensures that the bathtub remains watertight so that you can bathe with complete peace of mind. The

door is available as a left-hand or right-hand option to enable you to utilise the smallest of spaces. The integral built-in seat & contoured backrest allows the bather to remain in a comfortable upright position. The Texan has the largest door opening for easy entry and exit.

## The Imperial

A more luxurious model with a height of 40" and extra features including a door towel rail, bidet notch and a larger bathing space.

**Length: 51 ½" (1308mm)**

**Width: 30" (762mm)**

**Height: 40" (1016mm)**

## The Texan

This is the largest Walk-in-Bath-Tub in Europe. Generous dimensions for those who require extra bathing space. Like the Imperial it has its own towel rail and is hugely popular with the larger bather.

**Length: 53 ½" (1359mm)**

**Width: 32 ¾" (832mm)**

**Height: 41" (1041mm)**

## The Buckingham

A Walk-in-Bathtub that all the family can use. The same size as a regular bath, with the added feature of a door for ease of entry.

**Length: 59" (1499mm) or 66" (1676mm)**

**Width: 27 ½" (698mm)**

**Height: 22 ½" (571mm)**

- Door seal lifetime guarantee
- Inward opening door
- Easy to use door handle
- Steel frame
- Manufactured in glass fibre
- Optional extension box
- Stainless steel door hinge
- Hydra-Spa
- Thermostatically controlled faucet option
- Mixer valve with shower option

# Walk-in-Bathtubs

# The Jersey

# The Jersey

The Jersey walk in power bathtub gently lowers and smoothly lifts you to create a comfortable and secure bathing experience.

**Length: 59" or 66" (1499mm or 1676mm)**

**Width: 27 ½" (699mm)**

**Height: 22" (559)**

- Power lift belt. Easily removed for normal use
- Safely lowered and raised
- Door seal lifetime guarantee
- Inward opening door
- Easy to use door handle
- Steel frame
- Manufactured in glass fibre
- Optional extension box
- Stainless steel door hinge
- Hydra-Spa
- Thermostatically controlled faucet option via your installer
- Mixer valve with shower option via your installer

## **ACCESS WALK-IN-BATHS** LTD.

### **At Access Walk-In-Baths we care about Quality**

As a family run business, involved with Walk-in-Baths for more than 20 years, we know what it means when bathing becomes a problem. Years of experience in this specialised field means we are able to offer you the best possible advice and service. Unlike cheaper imports, made from acrylic, all our baths are hand built using the highest quality fibreglass with a high gloss finish, to ensure durability & product life. All the Walk-In-Bathtubs are built at our UK factory by fully trained skilled craftsmen to ensure our high standards are met every time. The bathtubs are built around a 1 inch steel adjustable frame to prevent twisting and leaking. We will not cut corners to produce inferior products.
